

Bachelor of Science (Hons.) in Healthcare Management

Standard Period of Studies: 48 months

ECTS Credits: 240

The Bachelor of Science (Hons.) in Healthcare Management introduces students to a wide range of subject areas, which are essential for understanding the complexities of administrative and further organisational processes in contemporary healthcare organisations. Navigating and organising organisational needs, medical requirements, and patient expectations is highly challenging and often means to find solutions in contradicting contexts.

Profound practice-orientation, which the course adopts is underpinned by academic frameworks, concepts, and further forward-leading theory. Students on the programme are part of interactive teaching and learning preparing them for qualified jobs in the healthcare provision.
