

MBA in Banking and Finance

Standard Period of Studies: 18 months

ECTS Credits: 90

The MBA in Banking and Finance's strategic objective is to equip students with relevant and practice-oriented knowledge and skills recommending Graduates for senior positions in the banking industry or other public, and/or private financial organisations.

The programme of studies is particularly focused on organisational needs of financial organisations. Modules on the programme of studies are consistently designed and consequentially structured to provide deep insights into complexities and driving forces of today's global financial streams. Equally, profound understanding is delivered on how the financial sector operates through national and global banks. This is not only about their economic tasks delivered through cross-functional insights, but also perspectives, which have sustainability, and managerial and corporate responsibility in mind.
