## **Master of Science in Healthcare Management**

**Standard Period of Studies: 18 months**

**ECTS Credits: 90**

The MSc in Healthcare Management provides students with deep insights into managing contemporary healthcare organisations. While effective management is one part of the programme's delivery, the scientific understanding of drivers and complexities supports graduates' understanding of underlying complexities and challenges. These can be often found in controversial contexts of patient needs, medical requirements, and regulatory expectations.

Profound understanding of a rich variety of supporting theoretical elements addresses their practical application in real world environments supporting the effort of the effective organisation, which can build efficient outcomes.

### **Modules of the MSc in Healthcare Management:**

1. Leadership in the Management of Healthcare Organisations
2. Innovation and Change for Healthcare Organisations
