

MBA in Maritime Management

Standard Period of Studies: 24 months

ECTS Credits: 90

The MBA in Maritime Management offers a sophisticated postgraduate programme of studies, which fully concentrates on needs, opportunities and challenges of the maritime industry, such as shipping or freight companies, ports and port authorities, shipping agents and the like. I.e., all learning content in each module has this particular sector in mind.

The concentrated orientation of the programme on contemporary maritime management provides students with latest knowledge, which is delivered by interactive and advanced lectures, seminars, and further contemporary means for improving management performance and decision-making processes through graduates' informed capabilities and skills. The objective of this programme of studies is to deliver selected theoretical methods and models of forward-leading effectiveness allowing direct implementation and application in complex organisational contexts of maritime organisations.

Modules of the MBA in Maritime Management:

1. Comprehensive Maritime Strategic Management & Adjacencies (5-day presence seminar)*
2. Port, Supply Chain, and Logistics Management
3. Maritime Accounting
4. Human Resources in the Shipping Industry
5. Maritime Operations Management
6. Economics of International Trade and Shipping
7. Maritime Governance, Compliance, and Law
8. Master's Thesis or Research-based Project Paper

* The 5-day presence seminar can be substituted by local delivery on two weekends, if not a sufficient number of students applies. The module counts as double-module and bears 15 ECTS credits.
